Commissioner Arthur H. Rosenfeld, Ph.D.,  
Associate Member

### **Principal Authors/Editors**

The Nonresidential Manual has evolved over the years with contributions made by many persons along the way. The 2001 Manual was adapted from earlier versions in response to a mandate by the California legislature in the form of Assembly Bill 970. This most recent version was edited and produced by Eley Associates. Charles Eley wrote much of the new material and served as the technical editor with assistance from Mark Hydeman of Taylor Engineering. Anamika Prasad provided coordination, graphics, and document production. Contributors from the CEC include Tav Commins, Gary Flamm, Jonathan Leber, Bill Pennington, Nelson Peña, Maziar Shirakh, and Ram Verma.

### **Technical Assistance**

The authors are grateful to many people and organizations that contributed to the development and production of this manual. The manual reflects, to a large extent, the comments made by the many people who took time to carefully review earlier versions. Reviewers who contributed to the content include, Lynn Benningfield, Jim Benney, Lance DeLaura, Martyn Dodd, Gary Farber, Henry Lau, Doug Mahone, Ken Nittler, Dee Anne Ross, Nehemiah Stone.

Lastly, so many others contributed helpful suggestions, and comments that are impossible to show a complete list. However, their assistance is acknowledged and greatly appreciated.

In spite of all our efforts, omissions and errors are certain to occur. These, of course, are attributed to the authors alone. If a Manual user discovers an error or has a suggestion, we request that it be brought to the attention of the Energy Efficiency Hotline at 1-800-772-3300 (California only) or 916-654-5106.
